

“Positive leaders are the ones who change the world.”
Jon Gordon

Certified Change Leader

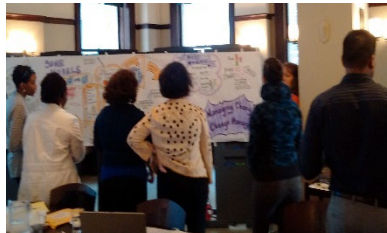

To successfully become a Certified Change Leader (CCL), you must attend the 2-day workshop, deliver a change strategy presentation, and pass the written submission demonstrating your application of the knowledge.

Program Objectives:

- *Understand Change through the lenses of Strategy, Culture and Disruption.*
- *Understand the difference between being and doing Agile as it relates to Change.*
- *Gain insight, tools and techniques to be a successful change leader*

Part 1 – The Workshop

Day 1: Change Strategy
Explore the drivers for change at a strategic level within organizations, focusing on the dynamic relationship of cause and effect for change events in every organization. The focus will be on defining change strategy, mergers & acquisitions, and the role of culture in organizations.

Graphic recording is regularly included

Day 2: Change Delivery
Reflecting on the effects of change, leadership expectations and the modern world we work within, the focus of this day is the relationship of Agile and change, preparing for disruptive change through an exploration of VUCA and how to build successful change agent networks in your organization. Significant group exercises and situational analysis will be used throughout the day.

Part 2 – The Presentation

At the end of day 2 you will be asked to work with 2 or 3 other attendees to create a strategy, plan and execution approach for a given change event.

It is expected that this will bring together much of the content learned across the 2 days and provide a vehicle to challenge the tools learned whilst defining those best placed to support your goals for change.

Part 3 – The Written Submission

When you have successfully completed the two-day workshop and presentation, you must submit a written paper of approx. 3000 words, demonstrating the application of knowledge gained as a change leader, to a change event of your choosing. We recommend this is done within 125 days of passing the examination

Who needs to be a Certified Change Leader (CCL)?

It is expected that attendees have either successfully completed the Certified Change Agent qualification or have at least 8 years experience if delivering a diverse range of change initiatives.

Typical attendees will be developing change strategies for an organization, such as:

- Change Management Practitioners,
- Project Leads,
- Directors and VPs of Strategy, Projects and Initiatives,
- Senior Change Consultants
- and those seeking to take a leadership role to move change forward will particularly benefit from this program.
